

Handwriting Group

Sensory Advantage is excited to continue our partnership with St. Thomas Aquinas to offer our innovative Therapeutic Enrichment groups as part of their before and after school programming. These groups promote targeted skill development and improved attention to support optimal classroom performance.

There is more to handwriting than just holding a pencil. Learning to write is a complex task that involves the integration of multiple systems. This group will introduce students to the Handwriting Hero Rules, an easy to understand and motivating framework that facilitates improved writing legibility. Participants will also build hand strength, fine motor coordination, and visual motor control through play with a variety of manipulatives and participation in multi-sensory arts and craft projects.

Offered to students grades K-4
